kbayinganarutimirwa@my.bcit.ca · [www.github.com/bayingana55](https://github.com/bayingana55) · <https://kellybayingana.dev>

TECHNICAL SKILLS

Languages: Python · Java · JavaScript · HTML · CSS
Frameworks: Flask · Node.js · Express · React · Tailwind CSS

Databases: PostgreSQL · SQLite · MongoDB
Tools: Git · GitHub · VS Code · IntelliJ IDEA

PROJECTS

ShiftLog | Personal

Jan 2026 – Present

- Built ShiftLog, a full stack web app using JavaScript, Node.js, Express, and PostgreSQL to track earnings across two jobs, manage spending, and project savings goals.
- Built pay calculations that account for overnight shifts, premium pay rates, unpaid breaks, and Vancouver time zones to estimate earnings from hours worked.
- Created responsive dashboards with Tailwind CSS and Chart.js to track paychecks, expenses, monthly budgets, and progress toward savings goals.
- Built RESTful APIs with input validation and PostgreSQL database migrations to manage financial data reliably, with 19 unit tests covering the app's core functionality.

ShadeFinder | BCIT Academic

Jan 2026 – April 2026

- Developed a full stack web application that identifies shaded outdoor areas using real time sun position and location data
- Built and integrated RESTful APIs to retrieve location and solar position data, processing geographic coordinates and time based sunlight conditions to determine shade availability
- Implemented user profiles, location suggestions, reviews, and saved locations with persistent database storage
- Designed frontend components for searching locations, displaying shade information, and interacting with user generated reviews
- Used GitHub for version control and collaborative development, working in an Agile/Scrum environment as Scrum Master and Product Manager
- Managed sprint planning, standups, backlog prioritization, and feature delivery across a 5-person development team

WORK EXPERIENCE

ROC 4SIX HR Platform (Kigali, Rwanda)

Jan 2026 – Present

- Developed an internal HR management platform to centralize employee records, recruitment, leave requests, and HR operations for ROC 4SIX business clients.
- Designed the relational database structure for companies, employees, job postings, applicants, and leave requests, using relationships to keep each client's HR data organized.
- Built employee and client management workflows that allow HR staff to add, update, search, and manage records through a centralized interface.

Apple Specialist · Apple Inc. (Surrey, BC)

Nov 2023 – Present

- Delivered front line sales and support in a high volume retail environment, maintaining a 92% average NPS by identifying customer needs and personalizing recommendations across Apple products, services, financing, and AppleCare.
- Recognized by store leadership for strengthening team culture and collaboration on a high volume retail store
- Acted as a go to resource for product knowledge, helping peers identify ownership opportunities for their own customers
- Serve as Volunteer Champion, planning and leading team participation in food banks and park cleanups, and coordinating with other store volunteer initiatives

Outlet Manager · Bourbon Coffee (Kigali, Rwanda)

Apr 2022 – May 2023

- Managed 3 outlet locations and a 15 people barista team serving corporate clients in a banking environment, increasing sales by 90% by introducing point of sale upselling and training baristas to recommend pastries alongside coffee orders, reducing end-of-day pastry returns.
- Reduced waste by running daily team briefings to align stock picks with customer demand, using baristas firsthand knowledge of regular customer preferences
- Removed a barrier to sales by partnering with the bank to deploy POS card machines on site, addressing a recurring payment gap for customers
- Strengthened customer facing culture by coaching and evaluating a 15 person team through ongoing training across all three locations

EDUCATION

Computer Systems Technology Diploma · BCIT

Sept 2026 – Present
